Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 25 September 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Election/Restrictions

2. Applicant's election without traverse of Species II- Figures 3 and 4 in the reply filed on 9/25/06 is acknowledged. It is noted that the Examiner originally indicated that claim 1 is generic, and the Applicant has further asserted such, in the response of 9/25/06. Upon further consideration, claim 1 is not generic. Claim 1 is directed to the embodiment of Figures 1 and 2, and not that of Figure 3 and 4, because in Figures 3 and 4, there is not a protruding part that overpasses the curtain airbag. As such only claims 6-13 read on the elected embodiment. The Examiner apologizes for any confusion.
3. Claims 1-5 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim.

Drawings

4. Figures 5a, 5b, 6 and 7 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct

any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 6-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Tanase et al. (US 2002/0175504 A1.) Tanase et al. teaches (Figure 11) a mounting bracket (3) attached to the roof side rail that supports a seatbelt anchor (54) such that the mounting bracket underpasses the curtain air bag (20A) between the roof rail and the air bag (the roof rail is generally understood to be the top corner of the structure shown in Figure 11.) Also taught is a rising member (bend under airbag, shown in Figure 11.) Regarding claim 7, a mounting part (10) that supports the curtain is provided, and attached to the roof rail as a unit with the bracket (because it is attached to the bracket by the unnumbered bolt, which is then attached to the rail area.) The curtain air bag is located above the rising member.

7. Claims 6 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Amamori (US 2002/0125696 A1.) Amamori (Figures 1 and 3) teaches a curtain airbag (20) stored along a roof side rail (32) including a mounting bracket (18) for a seat belt anchor. As shown in Figure 3, the mounting bracket underpasses the curtain airbag

between the side rail and the airbag, and has a rising member (turned portion at top of bracket 18, shown in Figure 3.) Regarding claim 8, at least part of the air bag is above the rising member.

Allowable Subject Matter

8. Claims 9-13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Ritter teaches an anchor bracket of interest. Yasuhara et al. teaches an airbag bracket of interest.
